

EAST TENNESSEE REGIONAL WOUND SEMINAR

Pressure Ulcer/Injury Prevention And Wound Care In Long-term Care Setting: Meeting Regulatory and Clinical Guidelines

October 18, 2018

COURSE DESCRIPTION

This information-packed, full-day seminar will provide up-to-date evidence-based recommendations and CMS mandated regulations for pressure ulcer prevention, recognition, assessment, and treatment. In addition, the most frequent non-pressure etiologies (e.g. venous and arterial insufficiency, diabetic neuropathic foot ulcers, and skin tears) will be reviewed.

Focused content on the Unavoidable Pressure Ulcer aka the Kennedy Terminal Ulcer/Skin Failure will be included to assist buildings in recognizing skin failure at life's end for the clinical team to address Quality of Life issues for residents with these unavoidable pressure ulcer/injuries. The regulatory focus of the course will be on F-Tags F684, F686, and F687.

This is a basic to intermediate level course and is appropriate for the new wound care clinicians and seasoned wound management providers.
